The Cumberland, Md., Alleganian of the 17th ult. contains the following item: There is a large number of families in the upper part of the city who obtain their coal supply for the winter rom trains passing down freighted with coa. Sman children, from 6 to 12 years of age, stanc a ongsice facing the train, with poles from 8 to 10 feet in length, and as the eye rests upon a lump lying a pirently loose upon the car, they place the stick in a position to come in contact with it, and the um rols from the car sometimes this "tour iament" practice tumb es the children over, and throws them in congerous proximity to the whitels, while the train is running at a speed of twelve miles per nour. This "hunting for coal" is not a deasure, but a duty, of the children, whose parents often combel them to go for it, and whip them if they eturn without it.

Some time since the University was taxed on the bonds, and a meeting of the Executive Committee was appointed to take action upon the matter.
